Primary
Leather:
Choose Color
and Texture

Primary Leather Option: Memal in “Island Print”

Memal is a cow leather that is softened and oiled in the tanning process so that it is grippy and feels broken-in from the very first ride.

This durable leather is the most common option for our saddles.

Memal comes in Island Print and in Buffalo Print.

Standard colors are black, dark brown, or nut brown. Other options provided upon request.

Primary Leather Option: Memal in “Buffalo Print”

Memal is a cow leather that is softened and oiled in the tanning process so that it is grippy and feels broken-in from the very first ride.

This durable leather is the most common option for our saddles.

Memal comes in Island Print and in Buffalo Print.

Standard colors are black, dark brown, or nut brown. Other options provided upon request.

Primary Leather Option: Real Buffalo

Real Buffalo Leather is thick and soft. It is extremely comfortable, but will stretch and fade more easily than cow leather. It is also slightly heavier.

Detachable Skinny Flaps™ cannot be made in Buffalo because the leather is too thick and heavy, but can be made to match in color.

Buffalo is available in black or brown.

Primary Leather Option: Wrapped Calf

When you choose padded calf, the skirts are sumptuously covered with thin padding overlaid with calf leather. Stitching holds the padding in place, and can be simple, or fancy. Choose your stitching pattern and thread color from available options for a soft and luxurious ride.

Padded calf may not be as durable as other leather options.

Primary Leather Option: Solid Hide

Solid hide is a 4mm-thick durable leather that is smooth when manufactured. With use and conditioning, the leather will soften. With regular and proper care, the leather will last for decades.

Solid hide is available in black, dark brown, and nut brown.

Say it in Brown

Use brown tones as accents, mix equal amounts of brown and black, or go for a solid-brown saddle.

When it comes to color, the choices are endless.

Dye lots and screen variations mean the colors you receive may look different than the ones in these photos.

If a precise color match is important to you, make it known when you place your order.

Seat and Thigh Block Color

We generally use French Calf (or, optionally, Oiled Calf) for our seats and thigh blocks.

Choose the same color for both, or mix it up.

The color, shape, and position of the thigh blocks will all be customized for you.

Thigh Blocks: Choose Shape and Position

Short Ultimate

Full Ultimate

Standard

Tear Drop

Thigh Support

Small Tear Drop

Use our “blocktester” saddle with patch of loop velcro to choose the shape, size, and position of your thigh blocks. Place the desired block in your optimal position, and photograph it. That’s all we need to make your custom saddle!

New for 2020, the “Zen Block” has a higher profile, and a softer foam cushion against the rider’s thigh.

Also available in a “blocktester” version.

What about Outline Stitching?

Create a one-of-a-kind look with stitching.

Outline the skirt of the saddle – or order a pair of stitched flaps, to match!

Shown here: Purple and Blue skirt edge stitching; burgundy welting with matching edge stitching; and matching stitched flaps.

Add Color with Welting

From classic white or cream to shout-out hot pink, accent your saddle to suit your taste.

Crystals? Pearls? Sure.

Custom Cante Insert and Thigh Block to match rider's DeNiro Boots (you must own DeNiro boots to obtain this leather).

Cante inserts can be subtle or dramatic.

Perhaps you prefer a textural change in the same color as the saddle? Or would you like to make a statement? We can design in almost anything.

The options vary as widely as your imagination.

Black patent leather insert with purple patent welting and facing (pinstripe and rolls) and custom black crystals set in silver.

D Ring on Colored Leather Loop

Small Details Make a Big Difference...

What about Rider Comfort?

A four-position adjustable stirrup bar can help you find the ideal hip/heel alignment. Changing the angle in your hip may also ease hip or knee pain.

We're all about it. From custom seat shapes, foam relief for your pubic bone, or a narrowed (or widened) twist, let us make you more comfortable than you thought possible.

Ready to order?

Here's how:

Your Customer Experience Manager will guide you through the process of making all your choices, and then will send you a custom specification for your review.

Once you approve the specification and the pricing, a 40% deposit will get your order started.

Every saddle is handmade in England to our exacting standard.

Allow 10-12 weeks for delivery.
